

Marquette University's Office of International Education Study Abroad office is working to get study abroad programming back overseas but doing so in a safe manner. To move forward with programming approvals from Marquette higher administration, we require further information regarding the corona virus (COVID-19) protocols at your organization. Please fill out the below questions in their entirety to the best of your ability to help facilitate the approval process for Marquette students traveling abroad. We understand the fluidity of the situation and that things may change, please fill out as regulations are currently and update us with changes. We are working diligently to offer safe study abroad options in the future and thank you for your assistance.

1. Do you anticipate students will be able to enter the country(ies) for the program? Many countries allow essential travelers and students to enter, even with their restrictions. However, given that they are participating on this program and will not have a student/study visa, will they be able to enter as tourists?
2. Does the country or partner require participants to be vaccinated? Does the country(ies) or organization require isolation/quarantine, if so what is the required time period?
3. What is the emergency contact information (name, phone, and email) during regular office hours, as well as during evenings/weekends?
4. Does the country(ies) currently have curfew hours in place or other travel restrictions? How will students be informed of local/country requirements pertaining to COVID-19 risk mitigation before and during the program should they change? How could this impact program activities?

5. What social distancing, masking, or other health protocols are in place?
6. Will COVID-19 health screening or testing will be done, or available? If not, where is this available? What is the typical wait time to receive test results?
7. What is protocol for contact tracing on site or in student housing?
8. What is protocol for students who are feeling ill?

9. What changes have you implemented related to COVID-19 as it pertains to student housing?

10. Will students have the option of selecting a single room with private bathroom?

11. What is protocol for students who must isolate/quarantine due to exposure or testing positive?
 - a. If a student has to isolate/quarantine where will students stay?

 - b. If a student has to isolate/quarantine what are the costs associated with the isolation/quarantine?

 - c. If a student has to isolate/quarantine, how will they have access to meals?

 - d. Will this continue to be available beyond the program end date if a student is contact traced or tests positive at the end of the program?

e. How will they be able to continue with their coursework?

f. What is your protocol for addressing parent/family concerns regarding isolation/quarantine or hospitalization?

12. Where can students get tested within three days prior to their return to the U.S. at the end of the program? (<https://www.cdc.gov/coronavirus/2019-ncov/travelers/testing-international-air-travelers.html>)
